Flexible insulation batts

Excellent protection against cold and heat – the STEICO insulation batts made of wood fibre are also particularly pleasant to work with.

Stable wood fibre insulation boards

Whether boards from the wet or dry process - at STEICO you will find the largest selection in the industry:

- Sarking boards
- Render carrying boards
- Rigid insulation boards for roof wall and floor constructions

Air injected insulation

Particularly economical and fast to install: Air-injected insulation made of natural wood fibre is the fastest and most economical solution for ecological insulation projects.

External thermal insulation composite system (ETICS)

STEICO ETICS: The perfectly coordinated and certified system of wood fibre insulation boards and render accessories – for timber and masonry construction.

Laminated Veneer Lumber (LVL)

Laminated Veneer Lumber / LVL is a highly durable wood-based material for the highest demands in timber construction.

I-joists

I-joists enable particularly lightweight and energy-efficient load-bearing structures – ideal for assembly and energy-saving houses

Sealing products

STEICO provides a complete system for sealing the building fabric

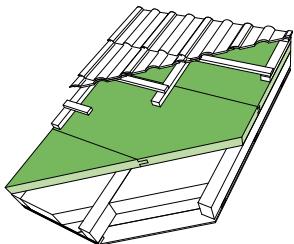

The STEICO Building System

Insulation, sealing and construction – ecological solutions for roof, floor, wall and facade

Insulation: Insulation systems for roofs: Sarking and sheathing boards

Insulation systems for roofs

Sarking and sheathing boards

STEICOuniversal – Sarking and sheathing board

PG 10

- Diffusion open sarking and sheathing board for both pitched roof and wall applications
- Triple function: cold protection, rain protection, wind protection
- Produced in wet process
- ca. 270 kg/m³, λ_D 0.048

Thickness [mm]	Length [mm]	Width [mm]	Edge profile	Number/pal. [pcs.]	Area/pal. [m ²] Gross	Area/pal. [m ²] Net	Price/m ² [£]
-------------------	----------------	---------------	-----------------	-----------------------	--------------------------------------	------------------------------------	-----------------------------

Handy formats, e.g. for construction site assembly

22	2,230 a)	600	T+G	104	139.152	134.761	RFQ
35	2,230 a)	600	T+G	64	85.632	81.144	RFQ
60	2,230 a)	600	T+G	36	48.168	45.644	RFQ

STEICOduo dry – Combined sarking and rendering boards

PG 27

- Diffusion open sarking and sheathing board for both pitched roof and wall applications, below rafter insulation and render board
- Produced in dry process
- ca. 180 kg/m³, λ_D 0.043

Thickness [mm]	Length [mm]	Width [mm]	Edge profile	Number/pal. [pcs.]	Area/pal. [m ²] Gross	Area/pal. [m ²] Net	Price/m ² [£]
-------------------	----------------	---------------	-----------------	-----------------------	--------------------------------------	------------------------------------	-----------------------------

Combo formats for roof and wall applications

40	2,230 a)	600	T+G	56	74.928	71.001	RFQ
60	2,230 a)	600	T+G	36	48.168	45.644	RFQ

a) Pallet format: ca. 2.25*1.20*1.22 m; 24 Pal./truck

Insulation: Insulation systems for roofs: Sarking and sheathing boards

STEICOspecial dry – Sarking and sheathing board

PG 11

- Diffusion open sarking and sheathing board for pitched roof applications
- Triple function: cold protection, rain protection, wind protection
- Produced in dry process
- ca. 140 kg/m³, λ_D 0.040

Thickness [mm]	Length [mm]	Width [mm]	Edge profile	Number/pal. [pcs.]	Area/pal. [m ²] Gross	Area/pal. [m ²] Net	Price/m ² [£]

STEICOmulti tape F – High performance tape with special foil

PG 34

- For sealing connections on STEICO membranes and wood based panels in combination with STEICOmulti primer and STEICOfix
- Solvent-free
- High UV and ageing resistance
- High moisture resistance/rainproof
- Can be used indoors and in protected outdoor areas
- Can be processed from -10°C (dry and ice-free substrate required)
- Perforated release liner eases application

Terms and conditions

The terms and conditions of sale and delivery of STEICO SE apply exclusively.

The terms and conditions of sale and delivery are available at steico.com/download on the UK Internet page under the menu item "Terms and conditions" or will be sent on request.

Notes

We spend approx. 80 % of our lives in enclosed rooms. But are we always aware what we are surrounding ourselves with? STEICO has set itself the target of developing building products which consider the needs of both man and nature. Our products are therefore produced using sustainable natural materials. They help reduce energy use and add considerably to a natural healthy internal climate. STEICO insulation and

construction materials, carry a number of distinguished 'seals of approval' which is a sign of high quality, healthy and functional building products.

The raw materials used in STEICO products are certified by FSC® (Forest Stewardship Council®) and PEFC (Programme for the Endorsement of Forest Certification), ensuring a traceable and fully sustainable usage of the raw materials. STEICO, the number 1 choice for your sustainable building solutions.

Natural insulation and construction systems for new builds and renovations – roof, ceiling, wall and floor

Renewable raw materials without harmful additives

Excellent cold protection in winter

Excellent summer heat protection

Energy saving and increased property worth

Weather tight and breathable

Excellent fire protection

Excellent sound protection

Environmentally friendly and recyclable

Light and easy to handle

Insulation for healthy living

Strong quality control

Compatible insulation and structural building systems

ENGINEERED BY NATURE
