

STEICO^{secure} Armierungspfeil

- Alkali-resistant fabric for diagonal reinforcement for STEICO^{secure} ETICS
- Plasticiser-free
- High tensile strength
- Slip-resistant
- Can be used indoors and outdoors

Application area

- Diagonal reinforcement for façade openings in ETICS, to prevent cracks in the corner area

Technical data

Colour	white
Fabric material	Glass fibre mesh

Forms of delivery

Delivery in handy boxes

Colour shade	Dimensions [mm]	Number/pack. [pcs.]
white	300*400	50

Notes

Storage

- Dry, protect from UV radiation and moisture

Disposal

- dispose with normal construction waste, observe applicable legal guidelines

Cutting

- Cut to size with a cutter knife (if necessary, as the reinforcement arrow is a finished part)

Occupational health and safety

- Observe the safety data sheet

STEICO *secure* Armierungspfeil

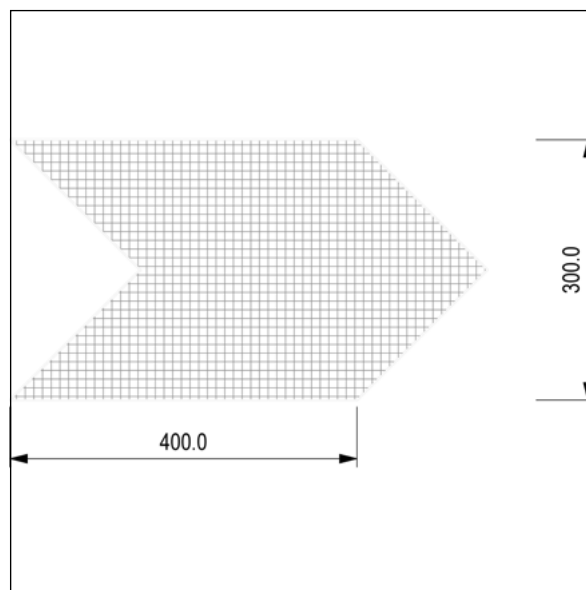

Installation

Substrate

- The preparation of the substrate must correspond to the current applicable national standards

Setting the reinforcement arrow

- Embed the reinforcement dart fabric into the freshly applied reinforcement compound (e.g. STEICO *secure base*) without bubbles or creases
 - The reinforcement arrow must be placed directly in the corner area
 - Overlap adjacent sheets / surface reinforcement by at least 10 cm at the joints. Work wet-on-wet so that full coverage of the fabric is ensured.
 - This corner reinforcement must be applied before the surface reinforcement in order to avoid bulging of the reinforcement compound (e.g. STEICO *secure base*)
 - Diagonal reinforcement must be carried out at building openings (e.g. doors, windows). This can be done using a reinforcement arrow, lintel corner bracket
- This document is based on the German technical data sheet and is intended for general information purposes in an international context. National regulations and building codes must be additionally observed.
