

# STEICO *secure* Lintel corner brack

- Universally applicable alkali-resistant reinforcing mesh in the corner area for STEICO*secure* ETICS
- High tensile strength
- Slip-resistant
- Can be used indoors and outdoors

## Application area

Lintel corner bracket as reinforcing mesh to prevent cracks in the corner area

## Technical data

Colour	White
Fabric material	Glass fibre mesh

## Forms of delivery

### Delivery in handy boxes

Colour shade	Soffit depth [mm]	Number/pack. [pcs.]
White	up to 200	25

## Notes

### Storage

- Dry, protect from UV radiation and moisture

### Disposal

- dispose with normal construction waste, observe applicable legal guidelines

### Cutting

- With overlay shears or other tools suitable for cutting plastic

### Occupational health and safety

- Observe the safety data sheet
- Wear safety goggles and work gloves when cutting to size

# STEICO *secure* Lintel corner brack

## Installation

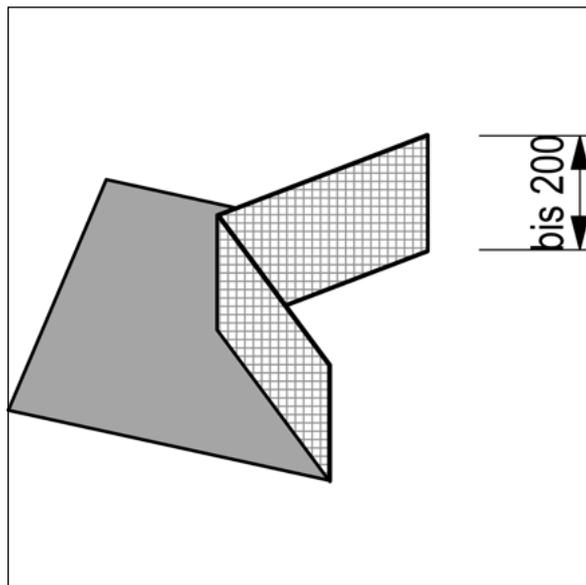

- This document is based on the German technical data sheet and is intended for general information purposes in an international context. National regulations and building codes must be additionally observed.

### Substrate

- Stable, even, dry substrate - free from substances that impair adhesion (e.g. grease, dirt)
- The preparation of the substrate must correspond to the current state of the art

### Setting the lintel corner bracket

- Embed the lintel corner bracket in the upper third of the reinforcement layer in the freshly applied reinforcement compound without bubbles or creases and smooth evenly
- Work wet-on-wet to ensure full coverage of the fabric
- This corner reinforcement must be applied before the surface reinforcement to prevent the reinforcement compound from bulging
- Diagonal reinforcement must be carried out at building openings (e.g. doors, windows). This can be done using a reinforcement arrow, lintel corner bracket

## Certificates and quality management
