

# STEICO SE FACT SHEET

The STEICO Group develops, produces and sells construction products made from renewable raw materials. STEICO is the global market leader in the wood-fibre insulation materials segment.

STEICO is positioned as a system provider and is the only manufacturer in the industry to offer an integrated wooden construction system in which innovative wooden load-bearing structures and bio-based insulation materials complement each other.

The insulation materials include flexible wood fibre insulation mats, rigidwood fibre insulation boards and air injected insulation made of wood fibres and cellulose. Laminated veneer lumber and I-joists form the load-bearing components of the system. Laminated veneer lumber and I-joists form the load-bearing components of the system.

Sealing products for the building envelope and plaster components for facade insulation round off the overall system.

The STEICO group offers its customers a unique range of products, including the prefabrication of complete components for timber frame construction.

The Munich-based company's products are successfully used in new construction and in the refurbishment of roofs, walls, ceilings, floors and facades. STEICO products enable the construction of future-proof, energy-efficient buildings with a particularly high quality of living. STEICO products provide reliable protection against cold, heat and noise, and support a healthy interior climate.

## MANAGING DIRECTORS

**Mrs. Aiveen Kearney** (CEO)

**Mr. Thorsten Leicht** (Production)

**Mr. Georg Faller** (Finance)

**Mr. Tobias Schindler** (Sales)

## KPIs

€ million	2023
Sales	365.3
EBITDA	57.7
EBIT	30.4
Employees	ca. 1800

## EQUITY STORY

### World market leader

STEICO is the world market leader for the production and distribution of bio-based wood fibre insulation materials and a leading provider of innovative construction products made of wood.

### Established system provider

STEICO has a unique position on the market with the largest range of wood-fibre insulation materials in the industry and an innovative construction system for timber construction. Almost the entire load-bearing and insulating building envelope of a building can be constructed using STEICO products.

### International customer base

The STEICO Group's international customers come from the wood and building materials trade, timber construction companies, the prefabricated house industry, laminate and parquet flooring manufacturers and DIY stores.

### Strong prospects

Investments in new products, modern, integrated production facilities, the highest production capacities in the industry and a highly qualified technical and sales team strengthen the STEICO Group's assets and create the basis for stable growth.

### Responsible action

The STEICO Group relies on sustainable forestry – the wood used comes from forests that are certified according to the strict rules of the PEFC. Independent tests such as those conducted by the Institute for Building Biology in Rosenheim are a reliable proof of the high quality of the products. The STEICO Group also sets standards with regard to environmentally friendly production and uses biomass as an energy source, for example.
