General information on verification of EPD from EPD tools
Independent verification of data, other environmental information and the declaration according to ISO 14025:2010, § 8.1.3 and § 8.1.4. Verification of each EPD is made according to EPD Global's guidelines for verification and approval requiring that tools are i) integrated into the company's environmental management system, ii) the procedures for use of the EPD tool are approved by EPD Global, and iii) the process is reviewed annually by an independent third party verifier. See Appendix G of EPD Global's General Programme Instructions for further information on EPD tools.

Comparability
EPDs of construction products may not be comparable if they do not comply with EN 15804 and are not seen in a building context. EPD data may not be comparable if the datasets used are not developed in accordance with EN 15804 and if the background systems are not based on the same database (including primary and secondary data).

Development and verification of EPD
The declaration was created using the Emidat EPD tool v1.0, developed by Emidat GmbH. The EPD tool has been approved by EPD Global.

Developer of EPD: Leonhard Garhammer
Reviewer of company-specific input data and EPD: Dr. Michael Makas

Approved

Håkon Hauan, The Norwegian EPD Foundation

Product

Product description

Wood fibres are breathable insulation materials, offering thermal and acoustic insulation. They regulate moisture, provide high heat storage capacity, and contribute to a comfortable indoor climate.

Application description

STEICO wood fibre insulation materials have a variety of applications, including underlays and rafter-level insulation for roofs, insulation for walls and service zones, and insulation for ceilings and floors. They can also be used for impact sound insulation and for insulating upper floor ceilings. STEICO wood fibre insulation boards can be rendered directly and used as components in external thermal insulation composite systems (ETICS).

Production process

Products included in average EPD

The following table shows the products included in this average EPD along with their respective amounts.

Contained product	Place of production	Production share
STEICOprotect L dry	Casteljaloux, France	52.56%
STEICOprotect L dry	Czarnków, Poland	47.44%

Product specification

Name of ingredient	Share of total weight	Country of origin
Wood	80 - 100 %	Various
Adhesives	2 - 10 %	Various
Polymers	2 - 10 %	Various

Technical data

	Unit	Value
Mass	kg	110
Thermal conductivity	W / (mK)	0.037

The product is produced according to the harmonized standard EN 13171.

Market

Poland, France

Recipients

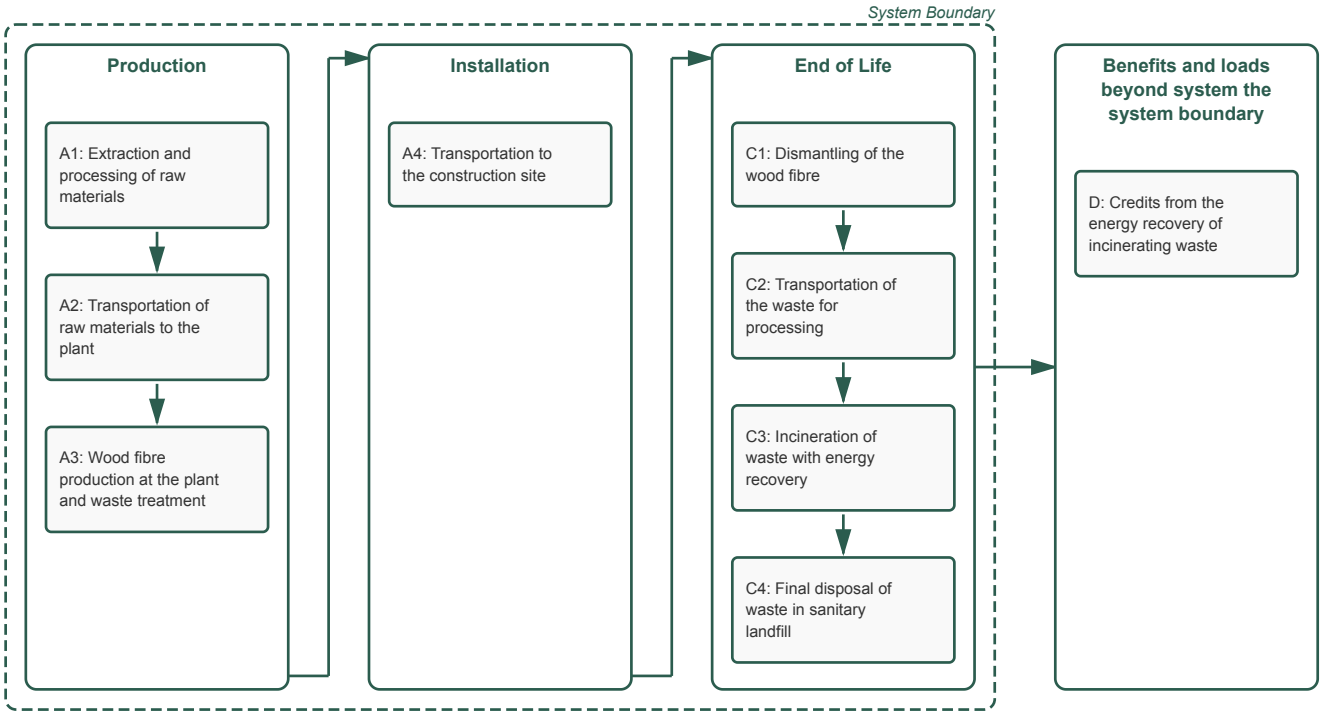
B2B

LCA: Calculation rules

Declared unit
1 m^3

Reference service life
Not defined

System boundary



Data quality
The foreground data are based on extensive and detailed data collection at the production site of the manufacturer, covering key processes such as raw material sourcing, formulation, and manufacturing. These foreground data are fully linked with corresponding datasets from the background database (ecoinvent 3.10) or with EN15804+A2-compliant EPDs, ensuring consistency, reliability, and maintaining alignment with the latest industry standards.

The overall data representativeness is rated as good with an overall score of 4.00/5 (range: 4.00 - 4.00) , in accordance with EN 15804+A2 Annex E guidance on data quality assessment, considering geographical, technical, and temporal representativeness.

The following table discloses all processes or activities assessed with very poor or poor data representativeness according to EN 15804+A2, as well as those assessed as fair that contribute more than 30 % to any core impact indicator in A1–A3:

Element	Minimal Representativeness	Source	Year
Chemical	Very poor	ecoinvent 3.10	2023
Adhesives	Poor	ecoinvent 3.10	2023
For grinding	Poor	ecoinvent 3.10	2023
For moulds	Poor	ecoinvent 3.10	2023
For steel	Poor	ecoinvent 3.10	2023

System boundaries (X=included, MND=module not declared)

	Production			Installation		Use stage							End-of-Life				Next product system
	Raw material supply	Transport	Manufacturing	Transport	Installation Process	Use	Maintenance	Repair	Replacement	Refurbishment	Operational Energy Use	Operational Water Use	Demolition	Transport	Waste Processing	Disposal	Benefits and loads beyond the system boundary
Module	A1	A2	A3	A4	A5	B1	B2	B3	B4	B5	B6	B7	C1	C2	C3	C4	D
Modules declared	x	x	x	x	MND	MND	MND	MND	MND	MND	MND	MND	x	x	x	x	x
Geography				PL/FR	MND	MND	MND	MND	MND	MND	MND	MND	PL/FR	PL/FR	PL/FR	PL/FR	PL/FR

For the geographies modeled in A1 and A2, refer to *Product specification*.

Type of EPD: Cradle to gate with options, modules C1-C4, and D

Stage of Material Production and Construction

Module A1: Extraction and processing of raw materials
Module A2: Transportation of raw materials to the plant
Module A3: Wood fibre production at the plant and waste treatment
Module A4: Transportation to the construction site
Module A5: Includes processes associated with installation of the wood fibre

Disposal Stage

Module C1: Dismantling of the wood fibre
Module C2: Transportation of the waste for processing
Module C3: Incineration of waste with energy recovery
Module C4: Final disposal of waste in sanitary landfill

Credits and burdens outside the system boundaries

Module D: Credits from the energy recovery of incinerating waste

Cut-off criteria

No cut-offs were applied.

Allocation

Foreground inventory data (energy and fuels, ancillary materials, emissions and waste) was collected at the production-process level. Using the total output of the production process in 2024, these flows are allocated to the reference product based on mass.

LCA: Scenarios and additional technical information

The following information describe the scenarios in the different modules of the EPD.

Transport to the building site (A4)	Value	Unit
Truck: Distance	300.00	km
Transported mass: Product and packaging	120.04	kg
Truck: Energy demand	1.58	MJ / t*km
Truck: Activity	transport, freight, lorry >32 metric ton, EURO6	-
Truck: Fuel consumption	0.52	l / 100km
Truck: Capacity utilization	53.30	%

Transport to the waste facility (C2)	Value	Unit
Mass to incineration	110.00	kg
Distance to incineration	50.00	km
Truck: Activity	transport, freight, lorry >32 metric ton, EURO6	-
Truck: Capacity utilization	53.30	%
Truck: Distance	50.00	km
Truck: Energy demand	1.58	MJ / t*km

Waste processing (C3)	Value	Unit
Material for incineration	110.00	kg

Reuse, recovery and/or recycling potentials (D)	Value	Unit
Substitution of electrical energy production	193.96	MJ
Substitution of thermal energy production	390.96	MJ

Calculation of benefits and loads per EN 15804+A2.

LCA: Results

The following results are based on the market-based electricity approach applied to the foreground system (A3). Further details on electricity data are provided in the Additional Requirements section.

PM: Potential incidence of disease due to PM emissions , **IRP**: Potential Human exposure efficiency relative to U235 , **ETP-fw**: Potential Comparative Toxic Unit for ecosystems , **HTP-c**: Potential Comparative Toxic Unit for humans - cancer effects , **HTP-nc**: Potential Comparative Toxic Unit for humans - non-cancer effects , **SQP**: Potential Soil quality index . **IRP**: This impact category deals mainly with the eventual impact of low dose ionizing radiation on human health of the nuclear fuel cycle. It does not consider effects due to possible nuclear accidents, occupational exposure nor due to radioactive waste disposal in underground facilities. Potential ionizing radiation from the soil, from radon and from some construction materials is also not measured by this indicator. **ETP-fw**, **HTP-c**, **HTP-nc** and **SQP**: The results of these environmental impact indicators shall be used with care as the uncertainties on these results are high or as there is limited experienced with these indicators.

Additional requirements

Greenhouse gas emissions from the use of electricity in the manufacturing phase

Electricity consumption in the manufacturing phase is composed from the sources below. This EPD follows the market-based approach.

Approach	Electricity	Quantity [kWh]	Emission Factor [kg CO_2e/kWh]	Product
market-based	ecoinvent: electricity production, wind, >3MW turbine, onshore (PL)	39.14	0.03	STEICOprotect L dry
(location-based)	(ecoinvent: market for electricity, high voltage (PL))	(39.14)	(0.90)	STEICOprotect L dry
market-based	ecoinvent: electricity, high voltage, residual mix (FR)	42.72	0.19	STEICOprotect L dry
(location-based)	(ecoinvent: market for electricity, high voltage (FR))	(42.72)	(0.08)	STEICOprotect L dry

Rows marked with () are provided for reference and not used in the assessment.

Dangerous substances

The product contains no hazardous substances given by the REACH Candidate List or the Norwegian Priority List.

Additional environmental information
